

# DIY Deco Mesh Spring Wreath

DIY Deco Mesh Spring Wreath

DIY Deco Mesh Spring Wreath

I just needed some Spring added to my house and so what could be more attractive than a bring colorful wreath. Alas, my **“DIY Deco Mesh Spring Wreath.”**

I have never worked with the Deco Mesh for a wreath before, I had shared back in December the Deco Mesh Garland that I made: <http://grammescountysplendor.com/budget-candy-cane-garland/> that was my first time working with the deco mesh.

So here are the supplies you will need to make your **“DIY Deco Mesh Spring Wreath.”**

- 1-21” Deco Mesh Roll (color of choice)
- 4-10” Deco Mesh Rolls (color of choice)
- Wire Ring
- Chenille Stems
- Scissors
- Ruler
- Flowers
- Ribbons

Supplies for DIY Deco Mesh Spring Wreath

The colors I used were the blue, green, pink, yellow, lime green & purple and it is a 14” wire wreath ring.

I started by cutting my 4-10” rolls into 10” pieces, then I attached the chenille stems on the ring, I have to tell you that I wasn’t really sure just how many or where to place these, but I ended up doing 2 on each section of the ring for all 4 levels of the ring. You can cut layers of the 10” deco mesh at once, makes it go faster.

Cutting 10"  
pieces of  
deco mesh.

Cutting layers  
of mesh

Wire Ring with  
chenille stems

Now it comes to the attaching the deco mesh step. I started with the 21" roll of deco mesh, you just take the end of it and attach it on the outside part of the ring, I didn't attach it on each ring, but you can experiment and see what you like best, you just kind of puff it as you attach it, whatever you like works!!

First layer of deco mesh

Once you have the 21" deco mesh attached you can start attaching the 10" pieces wherever you like, just roll them and fold in half and attach and you are on your way to forming your, **"DIY Deco Mesh Spring Wreath."**

Attaching 10" pieces onto ring.

Once you have all you deco mesh attached and are satisfied with how it looks you can cut your ribbon, I used the wire ribbon, it holds it's shape better. I cut my ribbon 10" long and then cut the a V out of the ends, attached it to the wreath as I thought looked good. I did not hide the chenille stems, since I used silver shiny stems I thought they added a nice touch to the wreath and actually you don't see much of them anyway. I also added the flowers at this time just securing them with the chenille stems also.

All the 10" pieces

wreath

And Ta Da there is the finished **“DIY Deco Mesh Spring Wreath.”**

## DIY Deco Mesh Spring Wreath

Because I had not made one of these before I needed some guidance and here is a link to a [youtube](#) that helped me along.

And also I purchased my Deco Mesh online here is a great link for a good price on the [deco mesh](#):

I hope you enjoyed this DIY Deco Mesh Spring Wreath share.
